

Ease of Cleaning

Each Clever Choice product has its own level of cleanability depending on its construction. It's important to match the product to each individual environment and circumstance.

All products are suitable for regular dry mopping and vacuuming as often as required.

High Absorption

Products with a high absorption rate, like Classic and all of our Timber Solutions, require spills to be wiped away quickly to avoid damage.

Standard Absorption

Our Origin, Fusion and Enchanted can withstand water for a few hours with no staining and only minor swelling of the board. This makes them suitable for light mopping with something like a spray mop.

Low Absorption

Water can be left on products like Shield and our Resilient Solutions (excl. Fusion & Enchanted) all day with little adverse effects making them suitable for environments that require constant or deep cleaning.

Top Three Collections

- 1. Resilient - Vinyl
- 2. Resilient - Hybrid (incl. Superior & Scenic)
- 3. Laminate - Shield
